

vprintf

```
int vprintf ( const char * format, va_list arg );
```

Print formatted data from variable argument list to stdout

Example

```
1 /* vprintf example */#include <stdio.h>#include <stdarg.h>
2 void WriteFormatted ( const char * format, ... )
3 {
4     va_list args;
5     va_start (args, format);
6     vprintf (format, args);
7     va_end (args);
8 }
9 int main ()
10 {
11     WriteFormatted ("Call with %d variable argument.\n",1);
12     WriteFormatted ("Call with %d
13 variable %s.\n",2,"arguments");
14
15     return 0;
16 }
17
18
19
```

Edit &

Run
